

## Manufacturer Standards

All undermount sink cutouts are cut with a reveal according to the sink manufacturer's template specifications. Sinks are always centered to overall length of the sink cabinet. Sinks with drainboards are centered to the cabinet by the sink bowls. **Any deviation from these standards must be brought to the attention of Latitude and requested in advance in writing before the countertop goes into production.**

### Reveal

- Standard Manufacture's Template.
- Partial reveal of the sink rim
- available for Kitchen Sinks

### Flush

- Sink rim is in line with the opening in the countertop.
- Available for Kitchen Sinks
- 1/16" to an 1/8" of an inch +/- (Could be greater)

### Recessed
